Floridas Spectrum "Mr. Entertainer of America". Oscar completed his first album "Vegas Love" while dancing with Cirque du Soleils "Mystere". From writing singing to dancing, this mellow artist's talents have taken him full circle and center stage. Oscar's words about his music. "My music is a soulful illustration of my experiences in life and love. I've transversed both the depths and the heights of love. Both extremes where nothing else matters. When I finally experienced the loss of true love, I tried to escape without putting my emotions on the line. I lived behind a mask and like a vegas show star, I lived only for the moments in the light with strangers surrounding me. Writing this album was a way to put together all of my different experiences from the best to the worst. As the pieces began to fit and the words took shape, I realized that I had been jaded by the image that I had created of myself. My music became my therapy and allowed me to break down the walls where I had hidden my emotions. My heart was slowly freed. I no longer needed to live the show life, I no longer need that temporary 'Vegas Love'."
