

# Peopleware - Peter Belohlavek

[DOWNLOAD HERE](#)

This book provides the necessary information to transform business architectures into operational business models. Peopleware is defined by the structure of objects that individuals have in their minds which define the models they use when dealing with hardware and software at work. Peopleware is what allows integrating hardware and software providing the true driver of the business model. It is necessary to understand the organizational equilibrium laws, the natural organization and the object driven business model in order to manage peopleware. When peopleware has been defined, an adequate aesthetic use of software with a solid hardware will make business processes operational. Peopleware is perhaps the most significant development to provide business operational solutions to companies. It allows transforming administrative systems into adaptive systems to upgrade work processes when managing businesses as unified fields. Peopleware is business architecture applied to work process design. It is for people who have a sound knowledge of the business that is being modeled.
