# Pushy - A Bold & Creative Marketing Wp Theme

[DOWNLOAD HERE](#)

Pushy A Bold & Creative Get it done & Multipurpose WordPress theme Responsive for Mobile & Tablet. Marketing, Business, Corporate, Creative, Blog there are so many options the possibilities are endless! WordPress 3.5 compatible iPhone 5 tested, WordPress 3.4.1 & 3.4.2 ready If you purchase, thank you and dont forget to rate the theme :) Only 35 Dollars! Full of features Homepage items Create as many homepage items as you want with our easy to use custom post type. Pushy Homepage item options Choose your colours (type them in or use the color picker), style and choose whether to use your featured image as normal, or as a tile or full size background image. You can create unlimited homepage items: showcase anything, shortcodes, videos it all works design and control each homepage item separately. See what our options panel looks like and how to setup your homepage Pushy Homepage video All post formats supported Aside, audio, video, gallery, image, status, chat, link, quote, standard we support them all in this theme. Why no sliders? Weve found from our own and other peoples research that homepage / hero sliders arent always the best way to convert sales or display important content. Anything past slide 1 often gets ignored and often slide 1 is frequently overlooked as customers think its some kind of advert banner. However, that is a choice that you the customer should make. Pushy has been tested with WooThemes Flexslider for WordPress and the Code Canyon LayerSlider WP and both are compatible. You can insert these via the shortcodes straight into any Homepage item or any page/post on your website. Please note: these will need to be purchased separately and the theme support does not cover

issues with the individual sliders. Unlimited Color Options You can control colours for the entire theme using our easy to use options panel. Pushy Colors More fonts than you can shake a stick at Google fonts, Typekit fonts, Adobe Edge fonts, standard fonts these are all built in and easy to setup, just follow the inline help. Pushy Fonts You can even change the road colour on your Google Map Pushy Map We Love Support We want to make sure you are happy with your purchase, if you have a question about how to do something or think you have found a bug, head over to our support system and well get back in touch. meanthemes.com/support/ Full feature list Choose between portfolio or blog items on the homepage. Order portfolio items using page order attributes Make portfolio items go anywhere from homepage, link to whatever page you like Turn off sub side navigation Sticky header on or off LayerSlider compatible WooThemes Flexslider for WordPress compatible All blog post formats supported Use admin format for date Specify how many tweets to show in footer Optional Flexslider powered portfolio slideshow.
