

The First Humans - Origin And Early Evolution Of The Genus Homo

[DOWNLOAD HERE](#)

Part I. Retrospectives and Theoretical Perspectives- 1. Early humans: of whom do we speak? - Richard E. Leakey- 2. Homo habilis - a premature discovery: remembered by one of its founding fathers, 42 years later- Phillip V. Tobias- 3. Where does the genus Homo begin, and how would we know? - Bernard Wood- Part II. Craniodental Perspectives on Taxonomy and Systematics- 4. The origin of Homo - William H. Kimbel- 5. Comparisons of Early Pleistocene skulls from East Africa and the Georgian Caucasus: evidence bearing on the origin and systematics of genus Homo- G. Philip Rightmire and David Lordkipanidze- 6. Phenetic affinities of Plio-Pleistocene Homo fossils from South Africa: molar cusp proportions- Frederick E. Grine, Heather F. Smith, Christopher P. Heesy and Emma J. Smith- Part III. Postcranial Perspectives on Locomotion and Adaptation- 7. Evolution of the hominin shoulder: early Homo - Susan G. Larson- 8. Brains, brawn, and the evolution of human endurance running capabilities - Daniel E. Lieberman, Dennis M. Bramble, David A. Raichlen and John J. Shea- 9. Interlimb proportions in humans and fossil hominins: variability and scaling- William L. Jungers- Part IV. Perspectives on Development, Diet and Behavior- 10. Growth and development of the Nariokotome youth, KNM-WT 15000- M. Christopher Dean and B. Holly Smith - 11. Dental evidence for diets of early Homo - Peter S. Ungar and Robert S. Scott- 12. Origins and adaptations of early Homo: what archaeology tells us - Helene Roche, Robert J. Blumenshine and John J. Shea - Part V. Environmental and Ecological Perspectives- 13. Plio-Pleistocene East African pulsed climate variability and its influence on early human evolution.- Mark A. Maslin and Martin H. Trauth- 14. Tracking ecological change in relation to the emergence of Homo near the Plio-Pleistocene boundary.- Kaye E. Reed and Samantha M. Russak- 15. Ecology of Plio-Pleistocene mammals in the Omo-Turkana Basin and the emergence of Homo.- Rene Bobe and Meave G. Leakey- 16. Biogeochemical evidence for the environments of early Homo in South Africa- Matt Sponheimer and Julia Lee-Thorp- Part VI. Summary Perspective on the Workshop - 17. The first humans: a summary perspective on the origin and early evolution of the genus Homo. - Frederick E. Grine and John G. Fleagle EAN/ISBN : 9781402099809 Publisher(s): Springer Netherlands Format:
