If you don't understand this, you are never going to be successful with women, no matter what you look like or how much money you have. * How to get rid of your fear of approaching and meeting hot women - You can be as cool as a cucumber when you're chatting to these women online, but if you don't bring your A game to the table on the first date, it's all over red rover. But don't worry, after reading this chapter, you will never worry about

being a jittery mess again, scouts honor. * How to get women literally obsessing over your online profile and jumping to contact you first - The worst thing you can do to hinder your online dating chances is to write a "me too" type profile like every other guy online. Women (yes, even the less attractive women) are literally hounded by men on these sites and are sick of the same old boring profiles. I even give you online dating profile examples you can steal as your own! * Learn how to write email follow-ups that get women's attention and you on a first date - The worst mistake you can make is giving up too much info too quickly and not asking for a date straight away. If you do this, you will end up becoming best friends with these women and not potential mates. * How to get a woman's phone number fast using instant chat services like MSN - Online dating is a step by step process and if this step is not working for you, you will never get a date. If you can't get a woman's phone number, quickly and confidently, you're dead in the water and some other guy will take the girl away from you again. * You will learn the complete step by step process I use to this day to get more dates in a week than any guy I know - The most successful guys I know use a 9 step guide when it comes to online dating and that's what I show you in this book in detail.
