Mechanical Response Of Composites

1 Computational Methods for Debonding in Composites, by Rene de Borst and Joris J.C. Remmers; - 2 Material and Failure Models for Textile Composites, by Raimund Rolfes, Gerald Ernst, Matthias Vogler and Christian Hhne; - 3 Practical Challenges in Formulating Virtual Tests for Structural Composites, by Brian N. Cox, S. Mark Spearing and Daniel R. Mumm; - 4 Analytical and numerical investigation of the length of the cohesive zone in delaminated composite materials, by Albert Turon, Josep Costa, Pedro P. Camanho and Pere Maimi; - 5 Combining elastic brittle damage with plasticity to model the non-linear behavior of fiber reinforced laminates, by Clara Schuecker and Heinz E. Pettermann; - 6 Study of delamination in composites by using the serial parallel mixing theory and a damage formulation, by Xavier Martinez, Sergio Oller and Ever Barbero; - 7 Interaction Between Intraply and Interply Failure in Laminates, by F.P. van der Meer and L.J. Sluys; - 8 A Numerical Material Model for Predicting the High Velocity Impact Behaviour of Polymer Composites, by Lucio Raimondo, Lorenzo Iannucci, Paul Robinson and Silvestre T. Pinho; - 9 Progressive Damage Modeling of Composite Materials under both Tensile and Compressive Loading Regimes, by N. Zobeiry, A. Forghani, C. McGregor, R. Vaziri and A. Poursartip; - 10 Elastoplastic Modeling of Multi-phase Metal Matrix Composite with Void Growth using the Transformation Field Analysis and Governing Parameter Method, by Ernest T.Y. Ng and Afzal Suleman; - 11 Prediction of Mechanical Properties of Composite Materials by Asymptotic Expansion Homogenisation, by J.A. Oliveira, J. Pinho-da-Cruz and F. Teixeira-Dias; - 12 On Buckling Optimization of a Wind Turbine Blade, by Erik Lund and Leon S. Johansen; - 13 Computation of Effective Stiffness Properties for Textile-Reinforced Composites Using X-FEM, by M. Kastner, G. Haasemann, J. Brummund and V. Ulbricht; - 14 Development of Domain Superposition Technique for the Modelling of Woven Fabric Composites, by Wen-Guang Jiang, Stephen R. Hallett and Michael R. Wisnom; - 15 Numerical Simulation of Fiber Orientation and Resulting Thermo-elastic Behavior in reinforced Thermo-plastics, by H. Miled, L. Silva. J.F. Agassant and T. Coupez EAN/ISBN : 9781402085840 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Camanho, Pedro P. - Davila, Carlos G. - Pinho, Silvestre T.
