"e-pop". Machine music with heart and soul. A melodic hybrid of 80's synthpop and 90's britpop with a light sprinkle of house grooves. 13 MP3 Songs ELECTRONIC: Pop Crossover, POP: British Pop Details: Carol Masters is an "e-pop" band. Machine-music created with heart and soul. Carol Masters was born in 1997 with Billy Miller (voices) and Rui Camarinha (machines). Though electronic by design, the sound of CM is not shy to borrow the guitar talents of Angelo Tursi and Fabio Guerriero. CM's very own "e-pop" sound is a melodic hybrid of styles from 80's synthpop to 90's brit-pop with a litte sprinkle of house-filled grooves. CM debuted in 1999 with "e.p." followed in 2000 by another e.p. "Embrace Me." Both maxi's are filled with non-lp's versions, b-sides, remixes and hidden tracks of fun stuff...just what pop music is all about! UNIVERSAL GREETING STATION: 59 minutes of 13 ultra-melodic pop gems. Songs about love and heartache. Songs about love and friendships. Songs about love and dancing! "Re:Mastered" a massive 2-disc remix cd (priced as one CD!) is also available!
