UK Innovator of intelligent original electronica. Varied styles from ambient and filmic soundscapes to futuristic visions. My aim is to give you something a little different and interesting so buckle up and enjoy the ride let's leave the world behind. 12 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Soundscapes Details: Im excited to offer this fine selection of electronica. \*\* This CD is a hand numbered LIMITED EDITION of just 50 \*\* The 2006 CD (Electric Dawn) features 12 new original tracks ranging from relaxing ambient journeys(Watch The Sky, After The Rain, Standing Stones etc), to a more uneasy style of sonic soundscapes (Free Robots, The Static Room). Themes of travel, science and nature have taken centre stage on these compositions. Each track is a journey and I want you to travel with me. BRIEF BIOGRAPHY Future Daze Of MetalBeat sole member is Ian Price, an experienced creator and innovator of exciting electronic music, striking visuals and eye-catching graphics. Originally from Liverpool (England UK), I worked with a number of bands down the years. Most of these excursions were experimental low-fi electronic affairs. A previous incarnation (Future Daze [Ian Price]) had a track released on an independent compilation CD release called Warped. I like to mix various styles of electronic music, like everyone we all have different moods, and so does my music. I have several new projects in progress. Firstly an ambient concept composition based on dream states and cycles. This is one continuous hour long piece following the theme of dreams. Ideal for relation. \*\* STOP PRESS \*\* - This CD is now available from the wonderful people at CDBABY - [cdbaby.com/cd/fdometalbeat2](http://cdbaby.com/cd/fdometalbeat2) I am also working on DVD based mainly around the Electric Dawn album. The visual are a mixture of computer generated graphic, live action and stills.
