

Content Management System Video Course + 3 Bonuses!

[DOWNLOAD HERE](#)

Comes with three BONUSSES! Don't settle for blogs anymore! Now you can use a simple yet powerful content management system that enables you to let others build your content for you. Brand new video series takes you through the process step-by-step! A great way to build your content is to set up a site where others can contribute their thoughts or stories to your readers. This gives you free content with no effort required on your part (other than moderation of that content). Constantly changing content brings

the search engines crawling and improves your rankings in those search engines, thus increasing your profits (be it AdSense, CPA or product sales). As long as your content is related to the topic of your site you will attract the right type of visitors. That is why you need to use a content management system rather than a blog. Having the right content management system makes all of this a breeze. Having one that is powerful yet simple and intuitive is the key. And the CMS I suggest you use is Geeklog. Geeklog encompasses all of the elements I went over above. It is extremely powerful but remarkably easy to set up and maintain. In this 4-part video series you will learn everything you need to know to set up your Own Geeklog Site in less than an hour! Here is just some of what you will learn: * How To Install Geeklog On Your Server * How To Use Plugins and Blocks * How To Configure Your Site * How to Update the Header on Your Site. And much more! BONUSES: BONUS #1: Recurring Local Business Video Course - with Private Label Rights: Here is what you will learn in this video course: 1. Video 1: The One Crucial Sentence - It discusses the first meeting with a perspective client (a small business owner) and the one crucial sentence that you should ALWAYS use to start the conversation! 2. Video 2: Building The Site - It covers building a site for a local business. It is really easy to do, and you can use a content management system (CMS) called WordPress to do it. 3. Videos 3-6: Customizing The Site - These videos deal with customizing the site and taking it from looking like the typical WordPress blog that you get when you first install WordPress and turning it into something that looks, feels and acts like a regular website. 4. Video 7: Google Local Business Center - The next step is to get the business and its website listed in the Google Local Business Center/Google Maps. This video discusses how to get the business listed so that when someone searches for Restaurants in Boise, the restaurant website of your client will come up at the top of the SERPs! 5. Video 8: The Best Traffic Source: This video covers the best traffic source for the website of your client. 6. Video 9: Recurring Income - This video tells you how to setup your business in such a way that you create a recurring income that comes in month after month, rather than one shot deals where you only get paid one time for creating a website for a local business! 7. Video 10: Summary Included is a transcript of all the videos above! That is not all! You will also get a "Resource Guide For Local Business Marketing" with this video tutorial course! BONUS#2: To make the deal even sweeter for you, we are even including two unannounced bonuses with it! Only those who purchase this product from us would be able to get the bonuses at NO cost! So what are you waiting for? Order today. 30-day money back guarantee! In case you are not 100 percent satisfied with your purchase, simply contact us within 30

days of your purchase and we will refund every penny! No questions asked!
