Fan Review: Greener is a band that is on the brink of making it to the bigtime. Excellent vocals with a great sound. This band is better than the majority of mainstream bands out there. This band really excels. I think this CD has the best cover art... 14 MP3 Songs ROCK: Modern Rock, ROCK: Hard Rock

LOVE the CD...Every song! I am officially "addicted".... ...cds great...songs are awesome....recorded amazing...love it..... ...The record is great boys. I've seen all of ya's develop in this band and in others and this is an awesome final result! the songs kick ass, recording rocks....this is definitely a winner..Can't wait to see where this leads you M-A-T-T... ...I have heard the album itself and about the album 1000 times through the birth of the idea, the progress and the final product but I never imagined it to be this perfect. Each time I listen to it, I find one more thing that just amazes me and I know all of it took so much work. I'm sure I couldn't even begin to understand the kind of work and hardship you guys pushed through, especially you (jay). I'm impressed, hardly surprised and proud. It's rare that some of my most musically stubborn and critical friends like rock bands with any hint of poppyness to them, but they were singing songs back to me in the halls and going on about how good the songs were (and believe me, they would even tell me an album i worked on for ten years sucked if they thought it to be true.) I think this album is incredible.... ...awesome, awesome, awesome....
