World fusion music 8 MP3 Songs WORLD: World Fusion, FOLK: Gentle Details: Chromatica is the latest CD from Savanna. The concept for this album came from an idea given to us by Nori Sandra Pope of Hadspen garden in Somerset. These original compositions are intended to reflect the colour coded planting that has made Hadspen world famous. As the colour in the garden changes so does its rhythm and intensity. We have tried, with Chromatica, to interpret that subtlety energy in the medium of music capture the essence of colour.
