Broadway stylings meets the blues. Sultry vocals with expressive piano playing equals Tassany. 12 MP3 Songs POP: Piano, EASY LISTENING: Mood Music Details: Cas Countz and Tracey Hudson formed the writing team of Tassany in August 2003. Quickly they realized they have a special sound together that translates well to many musical genres. Their personal influences range from pop, rock, folk, jazz, gospel and Broadway show tunes; roll all of those together and you will have an idea of the magic that has become Tassany. As word spread in the music community of their ability to create quickly and almost on demand, they were called upon to create music for different venues with very tight deadlines. Their greatest challenge was to create 12 original songs for a stage production in two weeks. When I was looking for an original score for my stage play, He Knew My Name, I was introduced to Tassany. In Broadway tradition, their compositions truly captured the heart of my script's message. They delivered music in different styles deliberately chosen to communicate the scene in the character's point of view. Whether playful or haunting, each song's melody and lyrics were a masterful blend that played in your mind long after the music ended. In just a few short months they have accumulated a wide group of friends with close to 10,000 listens and counting. I just had to come back and hear "Home" again...Great tune!
