Details: Finally, after years of delay, O Ajuntas das Sombras by Wolfskin is finally unleashed. Initially intended to be a re-issue of 2001s The Gather of Shadows by the Setting Sun (Ajna), it eventually evolved into a re-working of three tracks from that release, complimented by 7 additional tracks. As the Wolfskin era comes to end , this release represents a glimpse into their pasta more organic, flowing ambient record than what you may find today, and perhaps the least conceptual of all their releases. That being said, it most certainly will go down as one of their more stunning, darker visions; a masterpiece of shadowy atmospheres and drifting currents, featuring multiple layers of archaic sounds, foggy, nebulous textures, and ritual invocations, perfectly combined to form a release of intense depth and complexity.
