

Email Auto Format

[DOWNLOAD HERE](#)

It's not that people cannot follow these three simple steps ... The problem is that marketers do not know how to go through this process in the proper way for it to work for them. Look, it's a very simple process to understand... You go through the proper channels and get your business email address and IP address "White Listed" at the major email providers such as AOL, Yahoo, MSN, and others. Devise a simple process for making sure each of your emails that you send out are formatted properly, and make sure there are no "hidden" properties that may trigger the SPAM filters. Work through your email message, and find each "SPAM Trigger" word and phrase that can trigger the filters, then alter them in a fashion that DOES NOT trigger the SPAM filters. Once you have finished this process, 98 to 99 of your emails can get through. Tags: mailing, web, net
