

Hypnosis For Self Confidence

[DOWNLOAD HERE](#)

How would you like to start each morning feeling like One BILLION Dollars? Dear Warrior. My name is Brad Gosse, you may know me from such WSOs as Corkboard Cash, Personality Cash, Hypnosis for Weight Loss and many others. :-) Let me ask you some tough questions. * Are you afraid to fail? * Are you afraid to succeed? * Is fear your motivator? * Do you feel sick to your stomach before performing certain tasks? * Do you think any of these things are holding you back from your true potential? There is only one thing that will help you overcome all of these problems. I wish I could bottle this up and sell it in capsules. People with confidence succeed. How many times have you seen someone you know to be less intelligent than you make a bundle of money? Intelligence has never been an easy path to wealth. Confidence on the other hand empowers people with the knowledge that they will prevail. It has been shown countless times that sports teams who spend a certain amount of their practice time envisioning winning are more likely to win than teams that dont. People with confidence are more attractive. Women are more attracted to men who display self confident qualities. Men are more attracted to women with the same self-esteem. People who feel good about themselves put off a more attractive vibe than people who are depressed. People with confidence are happier. If you lack self-confidence you are walking around in a dark cloud of self-doubt and worry. On the other hand a confident person knows that the actions they take today will be fruitful. Its this knowledge that gets them up in the morning and keeps them motivated and happy throughout the day. What am I selling? A 36 minute MP3 audio track entitled Hypnosis for Self Confidence. Unlimited resell rights What will it do for me? Confidence is a gift that not everyone has. It gives us the ability to take things on without fear and more importantly with the knowledge of a successful outcome. Many people who lack confidence will enter into a new project fear and self-doubt. Whereas the confident person knows he or she has all the abilities within them to create the desired result. Whether you use this audio for yourself to improve your own confidence and self-esteem. Or you sell it to people who lack confidence (this is a huge market BTW). Either way you win.
