MP3 Songs ROCK: Acoustic, ROCK: Psychedelic Details: Organic and original genre crossing rock.  
Funky, jazzy, soulful, sometimes folky, sometimes electronic; psychedelic and full of feeling. This is an album that has a full sound but doesn't suffer from overproduction. Once again Greg played guitar, saxophone and sang with James Whiton on double bass and Guido Perla on drums. Many of the songs were recorded in the moment, capturing the feeling of three great musicians in a room just doing what they love to do - playing music. It's a rock album, but all three musicians are well versed in jazz and improvisation and this freedom definitely comes through. This is almost like an album and a half - the first ten songs feature the band playing upbeat songs, and the next five songs are just Greg, taking the listener deep inside. In this time of computerization and plastic disposable music, this is an album of real musicians playing real music with a real message.
