Why a CD/Book celebrating, uplifting and affirming African-American men, Marina has been asked. Her answer - As a poet, I have been asked this question more times than I can count. I don't mind the question, because what it does is offers me an opportunity to share my passion and hopefully heal the world with words of love. I simply celebrate what has not been celebrated openly enough: the spirit, fortitude, endurance, resilience, beauty and host of other positive traits embodying black men that have gone unnoticed, uncelebrated and unacknowledged far too long. With her poetry, Marina offers a contrasting perspective of the many negative images, stereotypes and descriptions that label African-American men today. She paints a vivid

picture of an intelligent, committed, educated, beautiful and spiritual being. She offers the world the opportunity to see what she sees. She presents black men a semblance of pride and remembrance of who they are. She offers black women an opportunity to receive black men with different eyes. She offers hope to children, healing for relationships and to the world. Visit Marina at: [marinathepoet](http://marinathepoet.com) or [myspace.com/thommarina](http://myspace.com/thommarina)
