Fans and critics alike are calling SmallTown the next big artist to watch for on all fronts. 12 MP3 Songs COUNTRY: Country Rock, COUNTRY: Modern Country Details: Out of the High Deserts of California comes Smalltown, a talented group of musicians/songwriters that bring together many different styles that culminate in an Eagles type of music that offers something for everyone. Packed with three lead singers(Mace McAdams,Stayce Roberts Jason Scot), all of whom are accomplished musicians in their own right, and the blistering guitars of Freddy Tierra, SmallTown brings a very identifiable sound that the world sorely needs right now. In a time where melody takes a backseat to marketing and songs are cut and pasted together like lab projects, these 4 solid songwriters have put together a top notch debut album that is winning critics and fans the world over. And though their influences are many, they are all crafted into their signature sound. You will be reminded of the power of bands like Def Leppard and Bon Jovi on songs like What If I Did and SmallTown, while ghosts of The Eagles will appear when listening to songs like Sometimes and I'll Be There. And Smalltown shares good company on this disc on the song Love of a Lifetime, where Jason Scot shares vocal duties with Delious Kennedy from Grammy-award winning pop music sensation All-4-One. Wherever your musical journey has taken you in the past, this band will help you get back there with this CD. Don't let this one get away.
