Humorous, Country, Rock, and Blues all in the menstrual vein. 10 MP3 Songs COUNTRY: Outlaw Country, BLUES: Dirty Blues Show all album songs: The Menstral Album Songs Details: After extensive research we discovered that a lot of people menstruate and thought it was about time somebody wrote some music for them.... so we did. 100's of menstruaters and those affected buy them were interviewed. The result.. The Menstral Album.. 10 awsome songs dedicated to the woman thing. The incredible musical tracks were laid down by some friends who play in the band of a famous artist. We can't say who because they are afraid their boss will get pissed.. you'll probably figure it out. The female singer "Spot" got a deal with a major label so we can't say who this TNN princess is either. "The Menstratin' Blues" (our favorite song) is featured in an award winning documentary "A Friend Comes To Visit" and has been extensively played on CNN and numerous radio stations around the world. These girls sure like the CD: "I listen to the Menstral Album for 28 days strait and then I break it all to hell and have to buy a new one every month..... but it's worth it!" (Dixie, Gallatin, TN) "I use to inhale a couple of quarts of scotch to get me through..... but now..... thanks to The Menstral Album..... I am gently lulled by divine music.... so glad to be a girl." (Jenni, Johannesburg, South Africa) Rag On, The Duncan Guy Band
