Loop based space music, using unique electronic musical inventions, producing 'theremin like' wailings, scratching, expressive synth playing and alien rap lyrics - truly music from Mars. 6 MP3 Songs

ELECTRONIC: Experimental, HIP HOP/RAP: Alternative Hip Hop Details: Imagine watching as a silver clad spaceman complete with helmet, mounts his technological platform; he is adorned with many strange alien sound manipulating devices, never before seen by earthlings. A groove begins on the funky Beatometer. Then the Claudatron swings into action with a smooth, fluid, throbbing bass line. Moments later this is pulsating in a groovy loop. The Rap Rod is next, with some funky rhythmic scratching.

Earthlings are now beginning to feel the beat, uncontrollably moving in a funky fashion. Then as if from space a wild Theremin like wailing emanates from the Claudatron with strangely beautiful alien melodies echoing in the terrestrial city scape. Then he speaks with an Alien rap thats groovy and phat. Suddenly he grabs the Orbatron, coaxing weird sounds from it, and bending them further, using the Transatron. A chaos theory of Alien technology and harmonic articulation with the power to move and groove..you will obey...sonicmanipulator Claude has been a musician, inventor and keyboard player for thirty years.
