Time released the Meditation of Thought EP when he was 16. He later went on to release his full scale album "Litterture", which has received international recognition. Time has collapsed both his lungs, one at a show and one eating meatloaf. His songs are a schizophrenic journey through his life riddled with complex messages shaped like a rubix cube. He is currently working on a new project with producer AwareNess. They are called "CALM", the album is titled "Anti-Smiles." Time is best known for his unforgettable live shows consisting of AwareNess playing everything live and Time running around wearing various objects. His music is true and doesn't contain the typical jiggyness stereotyped in with HipHop music. He is a straight-edge kid who has been deemed independent HipHop's prodigy by bokson.net. Who knows what he will have to offer by the time he can legally waltz into a bar.
