sounds like killing a gopher with a crutch. just kidding but at least your reading it. There is rock, country, blues with attitude, everything but polka, and if you'll play the tuba, I'll even try that. Good songwriting is the key to the universe. 10 MP3 Songs BLUES: Guitar Blues, COUNTRY: Country Rock Details: This site is simply about my music. Its been a 3-plus yr odyssey, but I finally got these songs out of my head and onto a Cd. The problem is now, I've got at least three times that many, back in my head! Oh well, I love this enough, I'll probably write, play, sing record my songs for the rest of my life. Who knows, maybe I'm creating something worth leaving behind me or at least something to play at my funeral. Every song on this Cd came from personal experience or inspiration of those around me. Some good, some bad. There are songs on here about ex-girlfriends(the songs stick around longer than the the girlfriends), working class people,dreamers,pissed off Indians(Joshua Blue) and those that believed in me those that didn't, As my song To the Naysayers goes, " Well I've gone to meet my maker and have my judgement day. I don't know if I'll get to heaven, but I done it my own way. When that role is called and my time has come to pass, just flip me over in my coffin, Let the Naysayers, line up and kiss my ass." Anyway, I hope you like what you hear and want to hear more. Because ya see, I want to make ya laugh, make ya sing, make ya cry charge ya 14 bucks to do it!
