

# Recent Advances In Qsar Studies

[DOWNLOAD HERE](#)

Part I Theory of QSAR- 1 Quantitative Structure-Activity Relationships (QSAR) Applications and Methodology- Mark T. D. Cronin- 2 The Use of Quantum Mechanics Derived Descriptors in Computational Toxicology- Steven J. Enoch- 3 Molecular Descriptors- Viviana Consonni, Roberto Todeschini- 4 3D-QSAR Applications, Recent Advances and Limitations- Wolfgang Sippl- 5 Virtual Screening and Molecular Design Based on Hierarchical QSAR Technology- Victor E. Kuzmin, A. G. Artemenko, Eugene N. Muratov, P. G. Polischuk, L. N. Ognichenko, A. V. Liahovsky, A. I. Hromov, E. V. Varlamova- 6 Robust Methods in QSAR- Michal Daszykowski, Ivana Stanimirova, Beata Walczak- 7 Chemical Category Formation and Read Across for the Prediction of Toxicity- Steven J. Enoch - Part II Practical Applications- 8 QSAR in Chromatography: Quantitative Structure-Retention Relationships (QSRR)- Roman Kaliszan, Tomasz Baczek- 9 The Use of QSAR and Computational Methods in Drug Design- Fania Bajot- 10 In Silico Approaches for Predicting ADME Properties- Judith C. Madden- 11 Prediction of Harmful Human Health Effects of Chemicals from Structure- Mark T.D. Cronin- 12 Chemometric Methods and Theoretical Molecular Descriptors in Predictive QSAR Modeling of the Environmental Behaviour of Organic Pollutants- Paola Gramatica- 13 The Role of QSAR Methodology in the Regulatory Assessment of Chemicals- Andrew P. Worth- 14 Nanomaterials the Next Great Challenge for QSAR Modelers- Tomasz Puzyn, Agnieszka Gajewicz, Danuta Leszczynska, Jerzy Leszczynski  
EAN/ISBN : 9781402097836 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Puzyn, Tomasz
