

Structural Bioinformatics Of Membrane Proteins

[DOWNLOAD HERE](#)

1;Title Page ;2 2;Copyright Page ;3 3;Table of Contents ;4 4;Evolutionary origins of membrane proteins;11 4.1;1 Introduction;11 4.2;2 Comparative analysis of F/V-type ATPases: example of function cooption?;13 4.3;3 Emergence of integral membrane proteins;19 4.4;4 Emergence of lipid membranes;20 4.5;5 Scenario for the origin and evolution of membranes and membrane proteins;27 4.6;Acknowledgments;31 4.7;References;31 5;Molecular archeological studies of transmembrane transport systems;39 5.1;1 Introduction;39 5.2;2 Molecular transport;40 5.3;3 Techniques to establish homology or the lack of homology;40 5.4;4 Transport protein diversity;41 5.5;5 The ABC superfamily;42 5.6;6 Independent origins for ABC porters;43 5.7;7 The phosphoenolpyruvate-dependent sugar transporting phosphotransferase system (PTS);45 5.8;8 Independent origins for PTS permeases;47 5.9;9 Reverse (retro)-evolution;48 5.10;10 Conclusions and perspectives;50 5.11;References;51 6;Resource for structure related information on transmembrane proteins;54 6.1;1 Introduction;54 6.2;2 3D structure resources;55 6.2.1;2.1 Protein Data Bank;55 6.2.2;2.2 Manually curated structure resources of TMPs;56 6.2.3;2.3 TMDET algorithm;57 6.2.4;2.4 PDBTM database;60 6.2.5;2.5 OPM database;61 6.2.6;2.6 Modeling protein lipid assembly;61 6.3;3 2D structure resources;62 6.3.1;3.1 TOPDB database;63 6.3.2;3.2 TOPDOM database;64 6.3.3;3.3 Prediction methods incorporating experimental results;65 6.4;Acknowledgments;66 6.5;References;66 7;Topology prediction of membrane proteins: how distantly related homologs come into play;69 7.1;1 Introduction;69 7.2;2 From membrane protein sequence to topologic models;70 7.2.1;2.1 Datasets of membrane proteins;71 7.2.2;2.2 Scoring the accuracy of different methods;72 7.2.3;2.3 Propensity scales versus machine learning-based methods;73 7.2.4;2.4 Methods for optimizing topologic models;74 7.2.5;2.5 Single sequence versus multiple sequence profile;76 7.2.6;2.6 Prediction of signal peptides and GPI-anchors;77 7.2.7;2.7 More methods are better than one: CINTHIA;77 7.2.8;2.8 A large-scale annotator of the human proteome: the PONGO system;79 7.3;3 From membrane protein sequence to function and structure;81 7.3.1;3.1 Membrane proteins: how many with known functions and folds?;82 7.3.1.1;3.1.1 All-alpha membrane proteins;82 7.3.1.2;3.1.2 All-beta membrane proteins;83 7.3.2;3.2 What do BAR clusters contain?;84 7.3.2.1;3.2.1 The cluster of

glyceroporins;84 7.3.2.2;3.2.2 The cluster of multidrug transporter proteins (EmrE proteins);86
7.3.2.3;3.3.3 The cluster of P-glycoproteins;88 7.4;References;88 8;Transmembrane beta-barrel protein
structure prediction;91 8.1;1 Introduction;91 8.1.1;1.1 1D feature prediction;92 8.1.2;1.2 -Contact and
tertiary structure prediction;92 8.2;2 Data;93 8.2.1;2.1 Benchmark sets;93 8.2.2;2.2 Cross-validation;95
8.2.3;2.3 Template construction;95 8.3;3 Methods;95 8.3.1;3.1 Secondary structure prediction;95
8.3.1.1;3.1.1 Neural network implementation;95 8.3.1.2;3.1.2 Two-class prediction (,);96 8.3.1.3;3.1.3
Three-class prediction (M, C,);97 8.3.2;3.2 -Contact prediction;98 8.3.3;3.3 Tertiary structure
prediction;98 8.3.3.1;3.3.1 Search energy;98 8.3.3.2;3.3.2 Template usage;99 8.3.3.3;3.3.3 Move
types;100 8.3.3.4;3.3.4 Conformational search;101 8.4;4 Results;101 8.4.1;4.1 Secondary structure
prediction results;101 8.4.1.1;4.1.1 Secondary structure evaluation metrics;101 8.4.1.2;4.1.2 Results
using SetTransfold;102 8.4.1.3;4.1.3 Results using SetPRED-TMBB;103 8.4.2;4.2 -Contact prediction
results;103 8.4.2.1;4.2.1 -Contact evaluation metrics;103 8.4.2.2;4.2.2 Results using SetTransfold;104
8.4.2.3;4.2.3 Results using SetPRED-TMBB;104 8.4.3;4.3 Tertiary structure prediction results;104
8.4.3.1;4.3.1 Tertiary structure evaluation metrics;105 8.4.3.2;4.3.2 Prediction results;106 8.4.3.3;4.3.3
Self-consistency results;106 8.5;5 Discussion;10 EAN/ISBN : 9783709100455 Publisher(s): Springer,
Berlin, Springer, Wien Discussed keywords: Bioinformatik, Membranproteine Format: ePub/PDF
Author(s): Frishman, D.
