The debut release from the Italian pop band. Featuring NYC guitarists Vinnie Zummo 4 MP3 Songs in this album (16:28) ! Related styles: POP: Pop, POP: Power Pop People who are interested in The Beatles Steely Dan XTC should consider this download. Details: Soundserif is a band born along with their first album ("12 pieces in the shape of an apple") project. It is a group of musicians strongly influenced by each other's musical backgrounds which are just too various and complex to be reported here. Some of the most important are the Beatles (whose White Album is often referred to as "the Bible"), XTC, Steely Dan, Beach boys, Squeeze, Jellyfish and, more generally, English and American pop and powerpop. At the moment the band is working together with the producer and sound engineer Piero Manzo on the forthcoming EP "Pieces", which will anticipate 5 of the 12 "pieces" by which their first album coming out in 2009 is composed. One of them, "Laptops", will feature as a special guest the NYC guitarist Vinnie Zummo (Check out Vinnie's new CD: "Swinging Guitar Sounds of Young America" at: cdbaby.com/cd/zummo2), who has been playing over the years together with artists like Joe Jackson, Art Garfunkel and Roger Daltrey.
