Dreamy with impressionistic lyrics, unaffected vocal style with well articulated acoustic guitar lines. 14 MP3 Songs FOLK: like Joni, FOLK: Gentle Details: Cats. Lightbulbs. Blueberries. What do they have in common? They do not travel well. The same can be said about singer-songwriter Suzi Katz. READ WHAT PEOPLE HAVE TO SAY ABOUT Three Day Rain...

"Suzi Katz is what I'd call an Impressionist songwriter. She's great - sets a mood and takes you to another place. And incidentally, she kills on guitar." -Patty Larkin "Her understated voice and depth of songwriting rival, if not surpass, that of [Suzanne] Vega." -Dirty Linen Magazine "...an impressive collection of gently rhythmic melodies with exquisitely sung, down-to-earth lyrics. This recording introduces Katz as an important new voice in acoustic music." -Acoustic Guitar Magazine "Like music I hear in my dreams, this is work with timeless appeal. I put it right into rotation." -Kevin McCluskry, Music Director, WUMB-FM Boston "Suzi's rhythms and melodies are subtle but sure, quietly beckoning to forgotten places." -Tim O'Brien "Dreamy, confident, and very, very musical... rhythmically adventurous and captivating. We like her ethno-percussion rhythm tracks, immaculate technique and strong Hedges influence, which resounds in her guitar parts and vocals." -Guitar Player Magazine "Suzi's voice is strong, rich, luminescent -- she's been compared to Joni Mitchell, and with good reason! Her songs appear to rise up, mist-like, capturing a mood or landscape in simple terms, disguising the underlying sophistication. Highly recommended!" -Ladyslipper "The tonal quality and character of her voice put her on the doorstep of pop-star status." -WNHU-FM
