Tokyo Bloodworm's music is a blend of complex tribal/glitch rhythms laced with subtle guitar melodies, lucid flutes, handmade white noise, hypnotic vocals, and soft field recordings, that leave your head tingling like the good times spent back in the womb 11 MP3 Songs ELECTRONIC: Down Tempo, ELECTRONIC: Ambient Details: Tokyo Bloodworms major style influences include traditional middle eastern and japanese music, folk and minimal electronic music. The musicians also utilize both unusual timing and space to create a sound that is original. Using these elements as a back drop, a sound has been created that is not only warm and organic, but one that is also dark and refined. This combination of moods exposes the listener to washes of guitars, floating melodies and heavy tribal rhythms. In contrast there are also moments free of sound except for the slightest twinge of handmade white noise and distant strings. Tokyo Bloodworm is dedicated to creating analog soundscapes, seamlessly combined with hauntingly chaotic electronics, which are filled with beauty and a highly seductive pulse.
