

## Mp3 Al Caldwell - Forbidden

[DOWNLOAD HERE](#)

9 and 11 string up up up bass for the open traveling Midi 11 string up up up BASS 16 MP3 Songs JAZZ: Unruffled Jazz, JAZZ: World Fusion Forbidden Songs Details: A combination of 5 string up up up 7,9 and 11 string up up up bass. I dream of a world where all bassist and arrangers can walk hand in hand and.....somebody stop me! :-) This bass project was created as an example of ERB possibilities. I'm playing the guitar sounds on my 9 or 11 string up up up bass. Some of the keyboard parts and horn solo's are from my MIDI basses. I love melody. I look forward to exploring the unlimited possibilities of these instruments. I still love to play my Adler 5 string up up up bass or my Benavente 5 string up up up Jazz bass. The meat and potato of bass is still playing in the pocket. I hope you like the grooves that i've come up with. I use the Extended Range Basses as a synth player would control an array of sounds. I'm working on music from a new perspective for me. Music is the richest form of art to me. It's Sonic Power! I hope you enjoy the music. I really love to play and the 11 string up up up bass is my greatest challenge. This tool will help me find the sounds that have elluded me as a foundation player. I named the cd "Forbidden" because of the rules I intend to break. In my mind.....I hear.....MUSIC!!
