Inspired by a broad range of artists spanning five decades of experimental, electronic, and pop music, he brings together an eclectic mix of styles and sounds. From compositions reminiscent of the ambient experiments of Brian Eno to the shimmering sonic textures of My Bloody Valentine, from the pop vocal-oriented songs of the Beatles to the electronic rhythms and synth melodies of Boards of Canada, Asosa creates a fresh musical aesthetic that looks to the future and draws from the past. Scheduled for release in the summer of 2007, Asosa's first full length CD, The Thirsty Circus, and EP, Clowns are a complex mix of multipart vocal harmonies, synth melodies, and algorithmically composed ambient soundscapes.
