releases!! \_\_\_\_\_ I was born in 1975 and raised in Southern California as the youngest of four siblings. I developed an interest in playing guitar in 1992 when I was about sixteen. I learned the basics on an Ibanez electric that was handed down from my brother and eventually grew very passionate about playing. As a beginner my inspiration was drawn from bands such as Metallica, Led Zeppelin, Megadeth, Aerosmith, Boston and many other rock and metal bands. I began writing my own music after about a year of playing. I bought a drum machine and a small 4-track recorder and soon after was finally able to put together some decent sounding demo's. Over the years I eventually assembled a semi- professional recording studio, which I now operate out of my home. My first album "Beyond Obsession" is essentially a collection of the first songs I wrote. These were all re- recorded for the album and styled as instrumental pieces. This album is my first attempt at instrumental music, I plan to include some vocal tracks on my next album. I still reside in Orange County California with my wife Jennifer and newborn daughter Emily. Although I am working fulltime I have stayed true to my love for music and I am currently working on my second album due for release at the end of 2005.
