[DOWNLOAD HERE](#)

Kids/Family music to teach mathematics skip counting (multiplication) and introduce music appreciation (different genres of music) 16 MP3 Songs KIDS/FAMILY: Educational, KIDS/FAMILY:

Sing-Along/Interactive Details: Educational Dynamix, Inc. just released the first of many mathematics education products. It is a musical mathematics CD for children in grades pre-kindergarten to middle school featuring Skip Counting (Multiplication) using multiplication facts from 2 through 9. The songs of Musical Mathematics add energy and excitement to mathematical lessons through singing and active engagement. This CD may be used as an instructional tool to enhance learning for students. Educational Dynamix has developed the Musical Mathematics series to increase mathematical content knowledge by integrating music into students learning of fundamental mathematical skills. Several popular genres of music are contained in this compilation that gives the listener an ear opening experience. The CD contains a number of cultures and rhythmic sounds that appeals to all audiences. These genres include Hip/Hop, Latin, Asian/African mix, Jazz, Country, etc. Diverse and effective methods of teaching mathematical concepts are utilized, in conjunction with the CD, to help promote learning and memory. There are 5 books written that may be purchased to accompany the CD. These books were written by Dr. Clemmie B. Whatley, an innovator and educator, who is the visionary behind this project. They are: 1. an instructional guide prepared for use by teachers 2. an instructional guide prepared for use by parents 3. a student activity book for grades K-2 featuring the twos and fives 4. a student activity book for grades 1-3 featuring the threes and the fours 5. a student activity book for grades 3-5 featuring the sixes, the sevens, the eights, and the nines Please visit our website eddynamix and click on the radio button Musical Math for more information. The CD features the melodious and captivating vocals of Liz Robinson. The

producer of the album is world renown, Kevin Broughton. About the Artist: A multi-faceted, multi-talented young lady, Liz Robinson, has accomplished many things and received numerous awards and honors for academic and musical excellence. Liz, a Phi Eta Sigma college honor student, began her formal music training at age 2 , and was considered a musical child prodigy. She completed this CD and is working on the DVD video for Educational Dynamix, which will present her singing songs with children depicting different music genres that will aide children in learning math via music.
