

Analysis And Control Of Ultrafast Photoinduced Reactions

[DOWNLOAD HERE](#)

Introduction.- Analysis and Control of Small Isolated Molecular Systems.- Complex Systems in the Gas Phase.- Coherence and Control of Molecular Dynamics in Rare Gas Matrices.- Ultrafast Dynamics of Photoinduced Processes at Surfaces and Interfaces.- Molecules and Clusters in Strong Laser Fields.- Vibrational Dynamics of Hydrogen Bonds.- Observing Molecular Structure Changes and Dynamics in Polar Solution.- Biological Systems: Applications and Perspectives.- Index. EAN/ISBN : 9783540680383
Publisher(s): Springer, Berlin Format: ePub/PDF Author(s): Khn, O. - Wste, L.
