Serious, sophisticated jazz fusion mixed with unexpected covers of songs by the Kinks, Wayne Shorter and Chuck Mingus. Packed with catchy melodies, great musicianship and too much FUN. 12 MP3 Songs

JAZZ: Jazz Fusion, JAZZ: Smooth Jazz Details: Alien Music Club's first serious jazz album is a joy from start to finish! There's a definite flow to it with each track leading to the next. Mostly instrumental, but with a few, well-placed vocal tracks, it showcases multi-instrumentalist composer Jonathan Pearlman (JP) with guest artists including flutist Joel Spencer and percussionists Jaron Pearlman and Robin Tolleson. Fresh original, the music has echoes of John Scofield, Joe Pass, Bill Evans, Wes Montgomery, Donald Fagan and Jeff Beck, among others. For the most part, it defies description, but you like it the minute you hear it. Truly a labor of love, Zero Digital Gravity should be part of your CD library!
