Instrumental music which sounds great in the background for parties and dinners. We like to listen to the cd while in the car. It's a welcome change from the radio. 9 MP3 Songs POP: Party Pop, ELECTRONIC: Pop Crossover Details: The MiniButters are two guys from Wisconsin who figured out they both lack the ability to write lyrics to their music. After several beers and games of darts the idea was hatched to just write instrumental music that people could throw on the cd player and use for background music. It plays well at dinners and parties and keeps your toe tapping while you take that boring ride to and from work. This is the perfect cd for those times you just don't feel like remembering the words to the song you are hearing on the radio. Give your brain a rest and just hum along to the Minibutters. Enjoy!
