Easy to install security script that stops hackers from using possibly their FAVORITE hack of choice - NETWORK SPOOFING. These are the number one criminal techniques used by hackers, hotlinkers, credit card fraud, etc. These hackers will use sites that publish lists of hubs you can connect into and make people think you live in england, florida, arizona, you name it. They think they are untraceable and for the most part they are. NOT ANYMORE! HA HA! This nifty script kills them in 60 seconds or less. No matter how many times they come back with a new fake IP they are blocked at the ROOT! After a few retries they will go to your less secure competitor and screw with them instead!
