

# Wordpress Profit System Plugin

[DOWNLOAD HERE](#)

I love WordPress. Its too easy to use, too effective at what it does, and its just the right price for my pocketbook. WordPress is software for the rest of us - cheap (its actually FREE, but we donate, right?), easy to use, and its good. But if you want to use WordPress as a platform for selling digital products, you need to be able to support PayPal and ClickBank and protect your digital property from being accessed by folks who've chosen not to pay first. You also needed something that made it easy to market products as an affiliate (to sell other peoples products that compliment yours) and effortlessly cloak my affiliate links. And say, if you've got SEVERAL products that you are going to sell on ClickBank, with the standard ClickBank procedure, you'll be looking at getting several clickbank merchant accounts (or need to buy other softwares that will let you sell multiple products on 1 clickbank account). That is going to cost you hundreds. So, what is your option? NONE! Yes, there wasn't really anything available that did all these things and worked with WordPress... Until the birth of Digital Product Demon is a simple, easy to use plugin that does exactly what most WordPress site owners want when selling digital products from their WordPress website. Digital Product Demon coupled with WordPress will let you: Easily sell digital

products with just a PayPal account - PayPal is easy to use, but it doesn't provide a way to hide your Thank You page or protect your download links. Digital Product Demon makes it easy to do both. It'll hide your Thank You page so that only valid customers can access it and it will expire your download page and encrypt your download URLs so that your links can't be shared or posted on pirating forums. Support multiple products in a single ClickBank Account - Digital Product Demon lets you use separate sales, thank you, and download pages for each product you define. That means that you can place multiple products in 1 ClickBank account but still display individually crafted sales pages for each product. Automatically cloak your affiliate links - The benefits of cloaking affiliate links have been discussed frequently on this forum and elsewhere. Digital Product Demons AFFILIATE mode handles this for you automatically! Protects your Download Pages - Download pages can only be accessed through a link that includes the buyer's purchase information. These pages are also set to expire after a period you specify - usually 3-5 days after the purchase. Protects your Download Links - create ugly, cryptic, expiring links that can't be easily shared or posted on freebie forums Hide your digital products actual URL - anyone who sees your download link won't have a clue about what your download filename is. Everything's all screwed up with numbers, letters, and special characters that don't mean a thing to anyone but Digital Product Demon Plugin . Automatically generate PayPal, ClickBank, and E-Junkie payment buttons - saving you tons of time fighting PayPal's button factory or customizing your own ClickBank buttons. Plus, because Digital Product Demon is a WordPress Plugin: It is Easy to Install - WordPress is known for its 5 minute install and installing WordPress plugins (like the Digital Product Demon) is a cinch It is Easy to Maintain Makes it Easy to Add Content - including new sales or review pages It is Super SEO Friendly - Google and Yahoo really LOVE WordPress It is Easy to Customize - both visually with WordPress themes and functionally with WordPress plugins. It supports the largest, free, most widely used payment processor in the world (PayPal) It supports the largest digital products affiliate sales network in the world (ClickBank) It supports one of the largest digital products delivery sites in the world (E-Junkie)
