This software has been proven to be able to generate more than 93 profitable trades amongst all the trades it has executed. Overall, I have found that the internal trading system of this robot really does work to generate profits regardless of whether the markets are trending up or down or going sideways. There are also clearly written step-by-step instructions provided in the PDF guide that teaches you how to download, install and attach the robot to the MT4 platform. Even complete computer novices have been able to set this up and get it working to make money for them automatically. Experience with Using The Forex Wonder Software With this trading robot, I can leave it to do all the tedious chart and technical analysis for me after I have attached it to the currency pair charts. Even though it may lose trades and end some days with losses, it has always managed to generate a profit in the long term without me having to monitor its activities constantly. It changes its trading strategies frequently to adapt to the market conditions of various currency pairs.
