You're LOSING Money - Each And Every Time One Of Your Website Viewers Gets A 404 Error This amazing software program is specially designed to monetize any web content whether it is regular web page content, an article, a blog or numerous other types of content all with a few simple clicks of your mouse. Has This Ever Happened To You? You've paid good money to have a killer solo ad sent out to tens of thousands of subscribers. And since it includes a time-sensitive offer -- viewers need to get to the product sales page by a certain deadline -- there's no room for error. Unfortunately, either you or the owner of the list typed the wrong URL address into your ad. Now what? Assuming you find out about the error soon enough, you can always send a second message to those same subscribers, one that includes the correct web page link. It's not the most professional scenario but at that point it's all you can do. Besides, what really matters is all the valuable time that's been wasted. Every single minute that passes by prior to sending the correction, you're LOSING money. And that's just ONE instance. Think about all the other places a viewer might encounter a bad link... An important message you posted on a discussion board. A quality article you wrote and distributed throughout the Internet. A link to your website that

someone else placed on their resources page. A classified ad that got blasted to FFA sites and/or safelists. A product or affiliate link in a paid or free distribution ebook you released. A product or affiliate link in an ecourse youre sending out through autoresponder. The list goes on and on. And with so many areas involved, its unlikely that you have the time or ability to be 100 certain no mistakes have occurred. So whats the solution? Say Good-Bye To 404 Errors Once And For All! Finally! A simple and completely effective method of doing away with all those ugly and unproductive 404 errors! How would you like to... Arrange it so viewers NEVER see another page cannot be displayed message, even if theyve come from one of your affiliate pages. Never again lose sleep over whether or not you happened to input a misspelled URL address in one of your ezine ads. Install a simple intelligent script that can determine on its own what page a viewer was looking for (even though it was typed wrong) and take them there without hesitation. Receive an instant email message whenever a viewer reached your custom error page (including comprehensive details of where they came from and what URL they were originally trying to access). Purchase a product that not only offers FREE lifetime upgrades but comes with a 100 no-questions-asked, money-back, full-refund guarantee. With Intelligent 404, youll have all this and more! And the installation is so easy, even someone with little or no script experience can handle it in a matter of minutes. Simply edit one file and upload four files to your web server. Thats it!
