

Mp3 A Day In The Life - Looking Back

[DOWNLOAD HERE](#)

Acoustic/Power Pop sundry with Indie/Alternative, to land an familiar look into a person's life. Songs astir life, have sex and loss, scripted recorded, and performed by Casey Walke. 10 MP3 Songs ROCK: Acoustic, POP: Power Pop Looking Back Songs Details: A Day In The Life is a creative outlet for multi-instrumentalist and producer Casey Walke. Formed as a sideproject for downtime between bands, A Day In The Life is now Casey's main focus. The inception began during a long hiatus of My Advice To You back in 2001. During that time Casey continued to write new material but focused on the more familiar, acoustic approach. "Left for the first time since I was 12 without a band, I didn't really know what to do with myself. My band mates were getting married and starting new lives without me. Family turmoil continued and I found myself with only my guitar to turn to." Writing music continued to be a productive outlet for Casey. "Being left without a band really made me focus on playing drums to fill out my recorded sound. I liked to play drums, I did a little with My Advice To You, but it was just enough to get by. So I focused really hard on getting solid enough to record my own music. I also started experimenting with piano, keyboard, and mandolin sounds. I use a really spontaneous approach to recording these instruments because I really have no idea how to "really" play them. I usually hit record and play along a couple of times until I get something I like and that's astir it." All of the instruments and vocals have been recorded in Casey's home studio. This album is really familiar but it doesn't spell out all the details. It leaves room for your own interpretations, it's not heart on your sleeve type emo. This album leaves room for your imagination. Influences include The Smashing Pumpkins, The Beatles, Jets To Brazil, Elliott Smith, Third Eye Blind, The Get Up Kids, Our Lady Peace, and Nickel Creek
