"I sang into my dad's dry-erase pens." Eventually transplanted to Austin, Texas in 1996 with a proper microphone, Erin has been featured as the voice of Apple Computer, her music has been used in Red Bull Energy Drink promotions, and she works with independent music producers nationwide. Most recently, Erin was selected from a catalogue of nearly 400 artists to become the first Artist-in-Residence at Rumblefish, a music branding and agency in Portland, Oregon. There she recorded her debut full-length album with members of Rye Hollow, Derby, and Five O'Clock People. Making music likened to Bebel Gilberto, Tom Waits, and The Sundays, Erin was one of just ten musicians selected by Red Bull to attend a production workshop in Dallas in 2005. From there, her first self-produced track became the Top Download at Austin Online Music. In 2006, Erin relocated to Illinois for a year to prepare her demos and expand her fan base. Now back in Austin, Erin looks forward to sharing the new record with you.
