Jogeir Liljedahl, of C64, Amiga and PC demoscene fame, returns after 9 years in silence with a beautifully melodic electronic music album, with special guests Chris Hlsbeck and more. 11 MP3 Songs in this album (63:14) ! Related styles: ELECTRONIC: Electro, EASY LISTENING: Nostalgia People who are interested in Rob Hubbard should consider this download. Details: Some words; First of all, thank you for buying my album! I decided to release this album in digital format only, mostly because people nowadays buy albums on the net, prices are much lower, and you get the music you want straight away. It also saves me a lot of expenses, coz the print-shops are not cheap if I want to get it done professionally. The important thing is that the music gets spread, and hopefully you will also enjoy the music I have made on this album! About the album, I have worked on/off on it for several years. In the meantime, I have been working on many other things to keep my creativity intact. I have to thank Fabian Del Priore for assistance help during this production, he's been an important part for me personally during this process, giving me insight and an honest opinion with all my work. Thank you Fabian, you are a true rastaman! :) I also have to thank Oeyvind Vik for his dashing contribution! His feel with the guitar simply brings something extra to my music. We have a good and similar musical understanding between us, so it's all just peachy when we work together! Thanks Oella! :) I must also thank Chris Hlsbeck for sharing some of his topnotch musical experience and for his contributing on the album. All the best to you your current "Symphonic Shades" project! I would also like to thank Bjorn Lynne for giving me his professional support as always. Also thanks to my family and to all my friends worldwide who has supported my over the years. Finally I hope you will enjoy this album, and hopefully I will be back soon with something new to chew your ears up!

Best regards, Jogeir Liljedahl
