Comedic putdown of everything sanctified by the moral right. 15 MP3 Songs URBAN/R&B: R&B Rap mix, ROCK: Progressive Rock Details: A little about myself I started my evolutionary climb as primordial ooze, after a wierd cosmic accident I collided with electro magnetic plasma, and spiraled into a new evolutionary form. After some ups and downs I evolved into this. So how am I doing so far? I knew when I was thirteen that war was STUPID, and dressed in my Beatles naru jacket and love beads, protested the vietnam war. We won, they stopped the war after over five million lives were lost. Australia's military commander said that war was a mistake- Hey big mistake. I mean these are the kind of mistakes you really only want to make once, unless of course you're a total moron. So here am I many years later again protesting the idiosy of war. Oh and the cause of it- Unhealthy Co dependant relationships. Peace little children, peace. Make laughter not war Peter Grose
