An autobiographical account of enduring chaos, adversity, and self destruction. 9 MP3 Songs

ELECTRONIC: Industrial, METAL: Industrial Metal Details: "The Celestial Hellgrounds...killer chaotic backgrounds... a deep foreboding of serious climatic tension which doesn't disappoint...the production is flawless...the heavy, machine chug of the guitars mixed with the waxing/waning synthesized progressions of Brock's programming grant this CD a label all its own."--Evolving Artist "Instantly felt like I was trapped inside an industrial chaos...all engines go...the heart of it pumps, could unbalance one with the intensity that punches home the point." --Garageband Definitely liking this a lot!!!! Very moody and thematic...Superb...Catchy right from the start and all the way through, you've got the right recipe!!!
