

The Link Customizer Pro

[DOWNLOAD HERE](#)

The Link Customizer Pro Software allows you to customize all of your text links and image links and also generates button links for you. Each link can have a title tag, open in current or new window & even display separate text messages in the status bar OnMouseOver & OnMouseOut. Additionally, you can add text for ALT tags for all of your image links. Adding all of this additional information for each link looks good to the search engines and adds accessibility functionality to your site. Just make sure that your text descriptions are actually relevant to the link provided. Tags: image
