Discover 14 Ways To Tap Into A Never Ending Supply Of Customers Ready To Buy Your Product For Free - Forever From The Desk Of: Timm Miller You know, when I first started out in online business almost seven years ago now, there was one thing drummed into my head over and over again by the big guys. One tip that would ultimately see my business become a success that they were all giving away for free. That little piece of advice was this.. They said to me "You know, the most expensive part of online marketing is getting customers in the first place". But you knew that already right? This information is freely available, but have you ever noticed how no one actually gives us as business owners a clear answer showing us what relevance that statement has to *our* businesses? If you've been in business a while, you probably already know this, but.. Through all of my complete newbiness to online business, after a bit of digging I managed to figure out what they meant. It was as simple as recycling resources and using them over and over again without having to bring in new customers, which is great, because it costs us nothing to promote our products successfully to our current contacts. So I took it a step further.. What if the same concept could apply to building your resources, not just making profit. Like a never

ending circle that meant my list grew and grew, quickly, non stop without taking any money out of my pocket? All that was needed was a small number of initial subscribers. Success! It took a few years, but I finally figured it out. So I took it further still.. What if there was a way not only to build my list and customer base for free in this way, but also carry out what many marketers deem the most expensive part of business for free too, and that's getting a subscriber base and customers in the first place. But wait.. wouldn't that mean non stop promotion for free, forever, no matter what the product is? It sure does! "I wish I'd have started buying your stuff when I first got into online marketing. I spent almost \$30,000 and 5 years of my time trying to figure out what you just told me in your course" K. Krys How to never run out of highly targeted potential customers again. It's all too easy to make mistakes when you've never experienced something before, online business is similar, the only difference is it doesn't just cost you valuable time, but burns a huge hole in your pocket too. Avoid these mistakes and prosper. *How attempting to build a good customer relationship could be destroying your business without you even knowing it's happening.
