

Mp3 Jauqo Iii-x - The Low C# Theory

[DOWNLOAD HERE](#)

avante funk rock fusion 7 MP3 Songs JAZZ: Jazz Fusion, ROCK: Funk Rock Details: Jauqo III-X, the bassist who gave us the Low C# string and the the world's first 15-string (5x3) electric bass guitar now brings us his long awaited debut CD called "The Low C# Theory." An eclectic kaleidoscope of heavy bass groove- oriented music that introduces to the world guitarist Kudzai Kasambira and 9-string guitarist DaLawn Simpson. Jauqo's rhythm mate is legendary guitarist Al Dimeola's drummer, Ernie Adams. If you're open-minded enough to venture into the uncharted realms of groove, high octane melodic texture manipulation, 110 improvisation and the spirit of life in the music you listen to, then this CD will not disappoint. Throughout the entire CD, Jauqo utilizes his fretless subcontra bass (tuned Low C# F# B E), never abandoning the groove, only reminding the listener of the role that the Bass really plays, from the most subtle setting to the all-out assault on the music's sonic spectrum overall.
