Cosmic mud, galactic sludge and experiments in dub. 5 MP3 Songs ELECTRONIC: Dub, ELECTRONIC: Down Tempo Details: Turn up the bass, sit back and relax in your favorite comfy chair and prepare to melt down with the latest release from Zentropia. After two years of toil Space Throne emerges from the depths of the outer universe to invade your couch. Sonic bass undertones will rumble your soul while the space saturated beats will free your mind to explore the outer murkiness of consciousness. Multi instrumentalist and producer Mark Bray is known for pushing the limits of modern dub mixing, seemingly distorting the very fabric of space and time. Space Throne continues in this journey with influences from the electric fusion of Miles Davis to the deep dark dub of King Tubby to the psychedelic experimentations of Pink Floyd.
