

Squeeze Page System - Hot! Hot! Hot!

[DOWNLOAD HERE](#)

Squeeze Page Set-Up Instructions: Create a new folder on your desktop called 'squeeze page or similar', download and extract the zip file into that folder and you'll see several files and folders. Right-click and edit the config.php file with notepad and add your details (name, contact email, PayPal email etc..) in between the ' quotes. I've highlighted the code that you should edit below...

```
----- $name = 'YOURNAME'; // your real name  
or pen name $email = ' YOUREMAILADDRESS@YOUREMAILADDRESS.COM'; // support email of your  
website $websitename = 'YOURWEBSITENAME'; // title of your website $websiteurl =  
'YOURWEBSITEADDRESS'; // your full website url e.g. yourdomain.com/ - include '/' at the end  
$webformid = 'WEBFORMID'; // your aweber web form id - refer to your aweber optin code for this value  
$listname = 'LISTNAME'; // your aweber list name - refer to your aweber optin code for this value  
$redirectid = '; // your aweber redirect id - refer to your aweber optin code for this value $clickbankid =  
'CLICKBANKID'; // go to clickbankto register for a free account $paydotcomid = 'PAYDOTCOMID'; // go  
to paydotcomto register for a free account $paypalemail = ' PAYPALEMAIL@PAYPALEMAIL.COM'; //  
go to paypalto register for a free account $orderfull = 'BUTTONCODE'; // your 1 line button code which  
redirects buyer to the full download page $orderlite = 'BUTTONCODE'; // your 1 line button code which  
redirects buyer to the lite download page // if using PayPal, go directly to the link below and create an  
'email' payment button in step 3. //  
  
https://paypal.com/uk/cgi-bin/webscr?cmd=_button-designer&factory_type=buynow $oto1 =  
$websiteurl.'oto.php'; // the file name of your one-time offer page. Edit between the '. Must end with .php  
and not .html $oto2 = $websiteurl.'oto2.php'; // the file name of your lite one-time offer page. Edit between  
the '. Must end with .php and not .html $download = $websiteurl.'download.php'; // the file name of your  
free download page. Edit between the '. Must end with .php and not .html $template = '1'; // changes  
theme of site - available options 1-4 ? -----
```

The first 4 lines should be straight-forward to edit and all the text on your site will update accordingly. One of the real secrets to building massive online wealth is to build a massive mailing list of people who like

you and what you have to offer. And in order to contact these people on-demand, you will need a dedicated list-server that a) stores 1000s of names and emails, b) allow you to send out emails on-demand and, c) allows you to send out emails automatically after you've acquired a new subscriber. For list-building we use a service called Aweber. This is where 95 of your online income will come from and is necessary for your success. Your WEBFORMID and LISTNAME can be obtained from Aweber after you have created an new autoresponder list. There are video tutorials on their site that teach you how to do this. When you edit your 'BUTTON CODE' you must place your 1-line buy-now code. This code will vary depending on which payment merchant you choose to use. Please refer to the merchant instructions for creating a payment button. With your squeeze page system you'll be able to make money with your one-time offer for a set of ready-made websites and down-sell for half the content. When creating your buy now button, please ensure that it redirects to the correct download page. It is highly recommended that you change the file name of your download pages from download.php to something like download25035908543635.php so that your products are less likely to be stolen. When you've done editing the config.php file and saved your changes and renamed your download pages, the last step is to upload everything to your website. You can either register a new domain for your squeeze page (recommended) or you can upload it to a sub-directory. Both methods work, but having a whole domain name dedicated to building your list looks more professional and will be easier for you when you come to promote it. The last step is to simple test your system. Check that it's working by signing up to your own squeeze page, checking that it redirects to the special offer page, then to the down-sell page and then to the download page, and also check that your payment buttons are working correctly. Now it's time to start promoting your site and building your list!
