The J DILLA DRUM KIT is comprised of 270 drum hits sampled from vinyl records. This drum kit was modeled after J DILLA and was sampled at 24 Bit - 48 kHz. These drums have the most grime from FLSTUDIODRUMKITS.COM. The kicks and snares are thick and contain that warm rich vinyl sound hip hop producers love. When you add this collection to your sound library, you will not stop making beats, you will not sleep, and your hands will be practically duct taped to your MPC pads forever! No joke... BUY NOW!
