Light, easy listening, original scores in new age crossover styles ranging from electronica to dance, classical and jazz. 15 MP3 Songs NEW AGE: New Age, ELECTRONIC: Ambient Details: Mooda This 15 track album features many different styles, from delicate new age tracks, to heavier dance and electronic crossovers. There is also a mix of classical and jazz tracks. If you like synthesizer music in a new age formula, then this is the album for you. Several of the track's have that "film score" sound, yet other tracks have that definite new age feel associated with many well known artist's in the field. Yet other pieces are loaded with guitar and synthesiser interplay with a mixture of several musical arrangements going on at the same time. Even if you are not familiar with his music, it is certainly worth your while listening to this album. Generally the music is of a lighter style, very smooth sounds, in a more easy listening range than his other albums that tend to be darker and more obsessive in nature. Mooda has a range of tunes to suit most tastes and moods. The music has been used in many different venues from therapy centers to cafe's and private listeners. As with his other albums all music and artwork are produced and designed by this artist and feature recycled products where possible. The CD's are available in Grey/Black, Green, Gold and Blue matching CD and jewel cases. Other Albums :- Galaxymachine 1999 Necronomicon and GREEN both to be released at the end of 2005
